1 Introduction

This package provides a means to use some PostScript fonts with LaTeX. The fonts are similar to some fonts used in the context of the startrek films.

The PostScript fionts are not contained in the distribution but have to be a got separately.

2 Usage

\la   The command `\la` changes the current font family to la and the encoding to T1. Usually this should be used in a TeX group only.

3 Implementation

\TNG   The macro `\TNG` selects the StarTrekTNGCrilleA family.

```
1 \DeclareRobustCommand\TNG{\fontfamily{ftc}\selectfont}
```

\textTNG   The macro `\textTNG` typesets its arguments in the StarTrekTNGCrilleA font.

```
2 \DeclareTextFontCommand\textTNG{\fontfamily{ftc}\selectfont}
```

\STClassic   The macro `\STClassic` selects the StarTrekClassicA family.

```
3 \DeclareRobustCommand\STClassic{\fontfamily{fsc}\selectfont}
```

\textSTClassic   The macro `\textSTClassic` typesets its arguments in the StarTrekClassicA font.

```
4 \DeclareTextFontCommand\textSTClassic{\fontfamily{fsc}\selectfont}
```
